

NOTICE TO PLUNKETT WATER CUSTOMERS

Temporary Water Service Disruptions – Curb Stop Valve Replacement

The Rural Municipality of Viscount No. 341 wishes to advise residents of the Community of Plunkett that **curb stop valve replacements** will be taking place between **Monday, July 27, 2026, and Friday, July 31, 2026**.

Please note: An **attached map** identifies the properties that are scheduled to have their curb stop valves replaced. **Only the properties shown on the attached map are expected to be affected by this work.**

What to Expect

- Temporary interruptions to water service will occur **only for the properties identified on the attached map.**
- The contractor will notify affected property owners as work progresses whenever possible.
- To complete the replacement, the contractor must excavate a large-diameter excavation around the curb stop location (15 feet x 15 feet). Depending on where the curb stop is located, excavation may occur in lawns, driveways, landscaped areas, or through fences and other surface improvements.

Property Owner Responsibilities

The RM respectfully requests that affected property owners take reasonable steps before work begins to remove or protect any items they do not wish to be damaged, including, where practical:

- Landscaping features;
- Decorative rocks or edging;
- Shrubs, flowers, and other plants;
- Irrigation components;
- Fencing or gates;
- Any other removable items located near the curb stop.

While the contractor will make every reasonable effort to minimize damage and restore the work area upon completion, excavation is necessary to complete the work and some disturbance to the surrounding area is unavoidable.

We appreciate your patience and cooperation as these important infrastructure upgrades are completed. This work is necessary to maintain the reliability and safety of the community's water distribution system.

If you have any questions, please contact the RM Office.
